Catálogo de fachadas

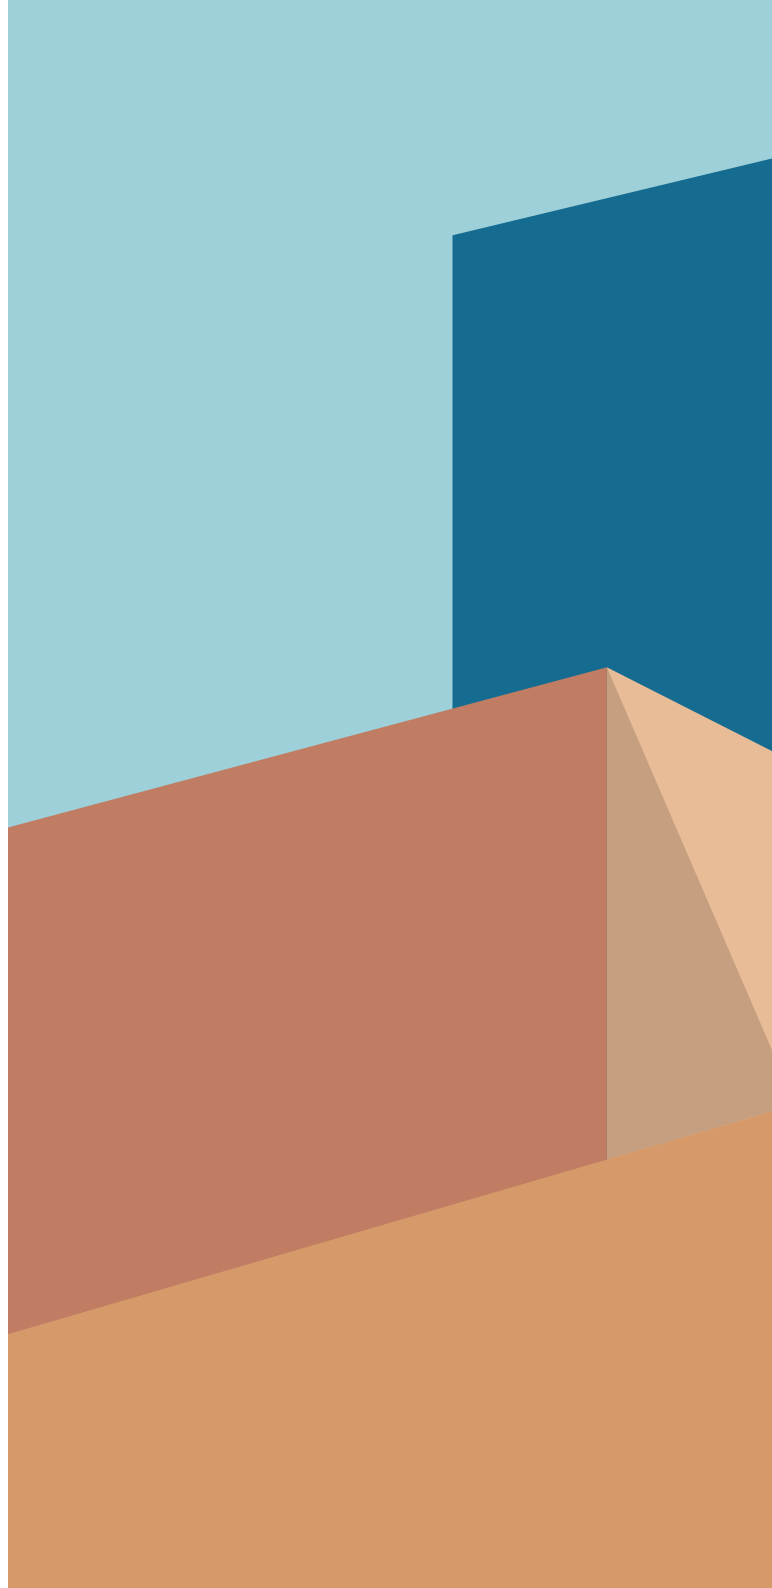

CIN

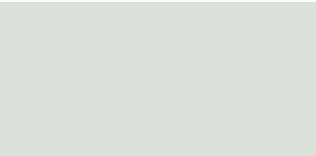

É essencial proceder à pintura exterior assim que se notem sinais evidentes de degradação nas fachadas. A fachada de um edifício deve estar sempre em bom estado de conservação, com uma pintura adequada que proteja eficazmente as paredes e a própria construção. Adiar essa operação pode causar danos que quando reparados tardiamente, aumentarão substancialmente os custos normais de uma pintura.

A Sotinco oferece tintas para exteriores adaptadas a todos os tipos de construção e localização. Para áreas com alto índice de humidade, variações térmicas, exposição solar intensa ou alta poluição, são recomendadas tintas que protegem as fachadas e garantem maior longevidade, prevenindo a sua degradação.

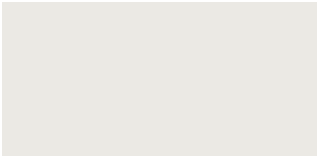

Neste catálogo, disponibilizamos um conjunto de cores formuladas e desenvolvidas especialmente para terem elevada resistência às intempéries e radiações ultravioletas no exterior, mantendo-se constantes ao longo dos anos. Sotinco Resulta.

São sempre de admitir pequenas variações nas cores exibidas, não obstante todos os cuidados postos na elaboração do catálogo. Recomendamos o exame da cor antes da sua aplicação.
